Dear Ms. Mostoles,

Greetings of solidarity from Pinas Forward!

Before anything else, we would like to express our sincerest gratitude to your organization for trusting and supporting our nation-building program.

We are pleased to inform you that despite the pandemic, we have successfully held 420 online camps and seminars nationwide, including Bulacan. Our campaign is on-going. And without our partnership, this much progress would not have been possible.

This is why we would like to continue our mission by helping our fellow Filipinos cope with the economic impact of the pandemic. The resulting unemployment and loss of livelihood from this crisis is a concern that we cannot ignore as nation-builders.

To respond to the needs of our fellow Filipinos, we will be holding a capacity-building program aimed at helping Filipinos tap entrepreneurial opportunities suitable for the "new normal." This way, we can help them find sustainable alternatives in recovering from the effect of the pandemic on their livelihood.

Our program will be composed of a series of livelihood training sessions, which we will begin with an introduction to digital finance and its features, tips on how it can be maximized, and its importance in the new normal for businesses.

The training session will be held for free, in partnership with Globe Telecom. It is open to students and parents. Teachers who might be interested are also welcome to attend.

In connection with this, we would also like to ask for your assistance in conducting a livelihood survey for our target communities. This will help us tailor a more community-responsive training program in the future.

In this regard, we would like to invite you for an exploratory partnership meeting through a video conference at your most convenient time.

Attached with this letter is our program for your perusal. Should you have any inquiries, please do not hesitate to contact us through june@mvm.ph and/or +639176251699.

Thank you, and we look forward to creating a meaningful partnership with you!

Sincerely yours,

June Joson

In the middle of a pandemic, digital payment applications have found importance in the lives of our fellow Filipinos. These innovations enabled a much safer and economically-practical alternative to facilitate business and financial transactions. The problem, however, is that the informational gap that hinders the access to these applications is yet to be addressed.

Hence, the purpose of this program is to educate marginalized Filipinos about the use of mobile payment and digital wallet applications, and how these can be utilized to help them achieve their financial goals. We believe that through these innovations, Filipinos can be able to tap into greater entrepreneurial opportunities and have better control over their financial well-being. Below is an outline of the program that we will be providing:
