Dear DepEd Division Heads,

Good day and I hope this email finds you well.

On behalf of ClimateScience Community Philippines (CSCPH), I am reaching out to request your assistance in inviting our schools and teachers to integrate climate education in their classes using our free climate education resources for teachers for a chance to win Php12,500, as part of our *Climate Waves – School in Action* program.

CSCPH is the local community of ClimateScience, a youth-led organization based in the UK with communities in 30+ countries, with the mission of promoting solutions-focused climate education through science-based, easy-to-understand, and fun educational materials and programs.

We recognize the vital role schools and teachers play in reshaping the trajectory of social change, such as solving climate change. This is why we have developed engaging and science-based materials for teachers to allow our teachers to integrate climate education in their classes, regardless of the subject they are teaching.

Our goal is to bring these materials to 1000 schools all over the Philippines. We also seek teachers' feedback to help us improve the materials and make them more effective tools for teaching climate change to students.

In this regard, we would like to invite you to join us in our mission by inviting schools and teachers to participate. Here is the link to the registration form, which contains more information about the mechanics: <https://bit.ly/ClimateWavesRegistrationForm>

Our raffle will happen on **December 17 and January 16**, where two teachers each from Metro Manila, Luzon, Visayas, and Mindanao will win Php12,500 each.

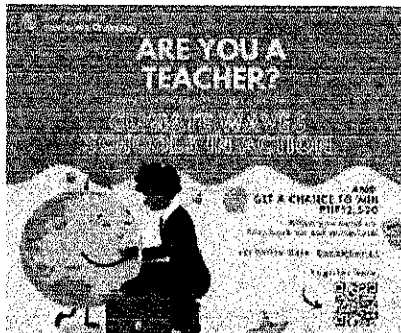

Please also find attached a poster, which you can share with the schools and teachers.

Please feel free to respond to this email or email jas@climatescience.org if you have any questions.

We hope that you'll find our mission of promoting climate education worthwhile and that you'll join us in making our transition to a sustainable future actionable.

Thank you and warmest regards,

Rochelle L. Bata
